- easy to use
- mess free application – you never have to touch any bugs or get your hands sticky!

A SCIENCE-BACKED WAY TO KEEP BUGS AT BAY.

STEM™ Flying Insect Light Trap

STEM™ Attracts & Traps Flying Insect Light Trap

How Does it Work

Use anywhere you see flying insects: Kitchens, bathrooms, garages, entryways, enclosed patios, near trash cans.

1. Remove the protective peels on both sides of the refill.
2. Insert the refill into the device base.
3. Plug the trap into an indoor wall socket. Trap rotates for UPRIGHT or SIDEWAYS positioning.
4. Keep the trap plugged in 24/7. When full, unplug the trap and replace with a new refill.

FOR BEST RESULTS

Place traps in areas with heavy flying insect activity and keep plugged in 24/7.

The blue light indicates it's working. Check refill every 30 days or as needed

STEM™ Fruit Fly Trap

STEM™ Kills Fruit Flies

A potent combination of ingredients designed to attract and drown fruit flies.

Sodium lauryl sulfate, ethyl lactate, malic acid, and the syrup ingredient provides a sugar source to attract the fruit flies to the liquid inside the jar.

WORKS IMMEDIATELY

LASTS UP TO 21 DAYS

How Does it Work

DIRECTIONS FOR USE

1. Shake well.
2. Twist off the fly-catching lid.
3. Remove the seal.
4. Place the jar near the source of your fruit fly problem.
5. Wait for the flies to fall right for your killer plan.
6. Replace after three weeks (or sooner) for max effectiveness
